TUTORIAL 6

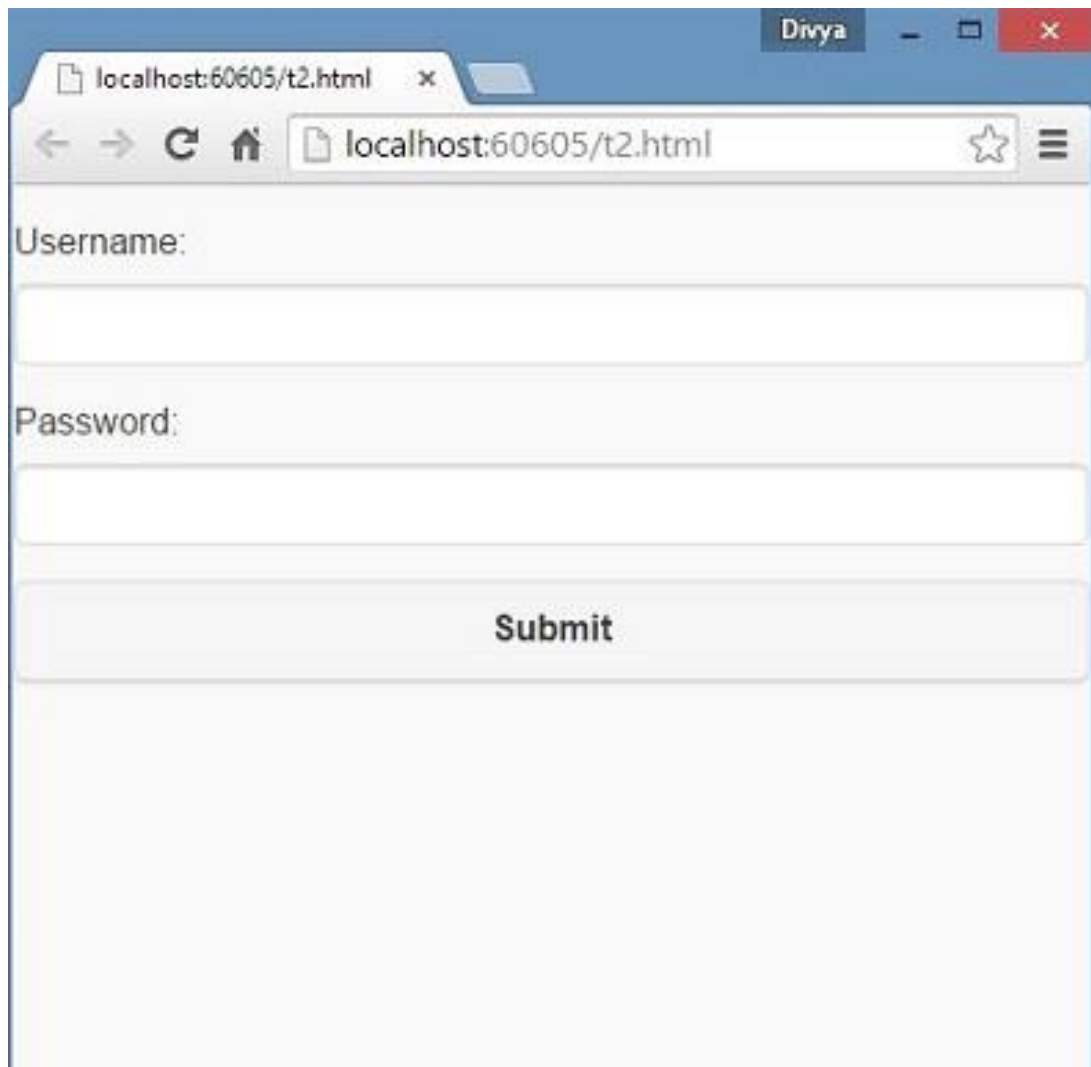

NAME: DIVYA VALA
STUDENT ID: 16198985

AIM:

To create log-in service as rest service and show the log-in service URL in separate tab.

OUTPUT:

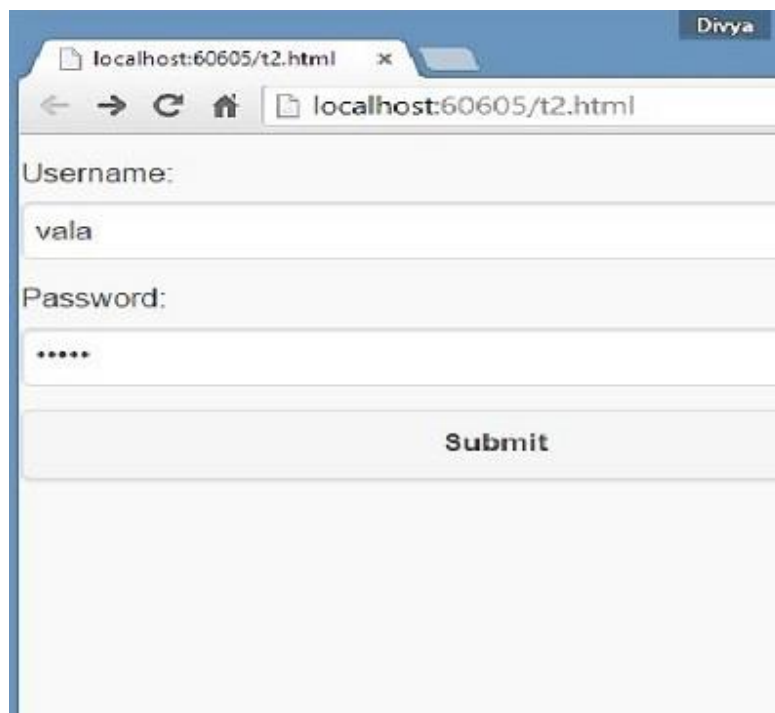

Login page created in tutorial2 is used to create log-in rest service.

A screenshot of a web browser window. The address bar shows 'localhost:60605/t2.html'. The page contains a login form with the following elements:

- A label 'Username:' followed by a text input field.
- A label 'Password:' followed by a text input field.
- A 'Submit' button centered below the input fields.

On clicking submit button Log-in service will return “WELCOME<username>”

A screenshot of a web browser window. The address bar shows 'localhost:60605/t2.html'. The page contains a login form with two input fields: 'Username:' with the text 'vala' entered, and 'Password:' with masked characters '.....'. Below the fields is a 'Submit' button.

So the final output will be
